EasyDo Digital Technologies

Android Developer

Description
Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Context: We are looking for a talented Android Developer to join us and support the company's strategy in mobile development.

Responsibilities
o Contribute to the full lifecycle of feature development, from initial concept to production release and post-launch support, actively adding value across all Agile phases (planning, design, implementation, testing, deployment, and maintenance).
o Collaborate with the Lead Developer, Technical Product Owner, and Enterprise Architect to shape and define technical solutions for new functionalities.
o Design and propose architectural enhancements to improve scalability, maintainability, and performance.
o Conduct code reviews to ensure high code quality standards while fostering knowledge sharing and continuous improvement within the team.
o Investigate, troubleshoot, and resolve issues to enhance application stability and optimize performance.
o Keep up to date with emerging technologies and industry trends, integrating relevant advancements when appropriate.
o Share expertise, promote best practices, and provide functional and technical guidance to team members when needed.

Qualifications
o Strong expertise in Android development (Kotlin), supported by delivered projects that demonstrate hands-on experience.
o Advanced knowledge of Jetpack Compose, with deep understanding beyond basic usage (architecture, state management, performance considerations).
o Solid grasp of the mobile ecosystem, common architectural patterns, and emerging technologies such as Kotlin Multiplatform (KMP).
o In-depth understanding of RESTful services and API integration.
o Ability to translate complex business and functional requirements into clear technical designs and specifications.
o Practical experience with Firebase services (e.g., Cloud Messaging, Dynamic Links, Crashlytics) is considered an advantage.
o Good understanding of mobile UX/UI principles and best practices.
o Experience integrating third-party SDKs and external services (e.g., camera features, document scanning, electronic signature solutions).
o Familiarity with monitoring and logging tools, including Firebase and Crashlytics.

o Experience working with Azure DevOps and implementing CI/CD pipelines.
o Comfortable working within Agile frameworks, particularly Scrum.
o Professional proficiency in English.
