EasyDo Digital Technologies

Agile Business Analyst (ABA)

Description
Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions , driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities
Context:

The Agile Business Analyst main function is to assist the Product Owner in the daily backlog management (writing of User Stories, validation of User Stories, sorting and priorization of backlog). He/She cannot replace the Product Owner who is the only backlog responsible and decision maker.

Main responsibilities:

- Provides Digital expertise
- Enlightens with digital experience the solutions imagined by Product Owner (best practices, consistency with market standards…)
- Gives advice on possible improvements in product backlog
- Supports Product Owner in Product Backlog priorization
- Proposes priorization adjustment based on the perceived value
- Participates in lifecycle of Product Backlog
- Ensures that the Product Backlog is visible, transparent, and clear to all
- Details each selected feature in the form of a User Story small enough to be implemented within one sprint, including acceptance criteria necessary for the team to understand and develop the user story
- Understands and prioritize Technical Stories suggested by the team as well as Defect Stories
- Clarify any User Story upon request from the Development Team during a Sprint
- Participates and contribute to Agile events with the Team
- Contributes to testing User Stories developed by the Agile team
- Accepts or refuses developed Stories (if the Product Owner has granted delegation)
- Evaluates the quality of previous releases and current release in production
- Checks the new release for regression issues

Qualifications

- Need to have data transformation mindset, data quality testing, also need to be familiar with inspecting data
- Need to have good understanding of the Agile frameworks and principles
