Cobol developer (French speaker)

Hiring organization
EasyDo Digital Technologies

Employment Type
Full-time

Date posted
May 16, 2025

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions , driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Context:

The Cobol Software Developer will assist with the development and maintenance of ongoing projects.

Responsibilities

- Besides development, contribute to the technical analysis: understand detailed functional specifications and participate in translating them into technical specifications.
- Estimate the workload required for development and unit testing.
- Familiarize with and adhere to the operating rules of the development environment.
- Code/setup and document produced work while ensuring compliance with standards and procedures (architecture, security, quality, documentation).
- Define unit test cases for product components and ensure compliance with technical specifications.
- Conduct performance tests (BDDs) and related IT testing (e.g., non-regression, unit tests).
- Contribute to 3rd level support, including incident resolution monitoring and troubleshooting.
- Maintain and adapt code in response to technical evolutions and requests/projects (technical specifications, performance, security).
- Provide and implement improvement solutions according to development standards and architectural rules.
- Explore and discuss innovative solutions for cost and simplification benefits.
- Manage interventions in project mode (agile or v-cycle) or maintenance mode, depending on importance.
- Involve in the project life cycle and development after requirements.
- Maintain a good relationship with technical operations teams.
- Ensure proper documentation of all developed and released solutions in production.

Qualifications

- 3+ years of experience as a developer.

- Technical knowledge in mainframe (MVS, TSO, JCL) and Cobol programming.
- Experience with technologies such as CICS, DB2, CTRL-M.
- Understanding of IT architecture with at least 2 years of experience on different projects.
- Previous experience in the finance/accounting field as a developer is a plus.
- Proactive, creative, and innovative with strong analytical skills.
- An academic background and/or Master's in Cybernetics, Accounting, Banking, or Finance is desirable.
- French language knowledge at least at B1 level with a willingness to improve.

Job Benefits

We offer

- Competitive salary and the opportunity to have a meaningful job where you can make a difference
- The chance to continuously evolve as a professional
- Medical insurance & Meal tickets. Variety of training opportunities
