EasyDo Digital Technologies

Data Analyst

Description
Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions , driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities
Main responsibilities:

- Analyze available data from operational systems or the Datalake in collaboration with architects and the ABA team, in line with business needs.

- Manage data ingestion into the Datalake (physical or virtual), if required.

- Build analytical models based on business requirements.

- Implement dashboards directly or guide their development.

- Perform ad-hoc analyses for specific or exploratory needs (using SQL, Python, and other tools).

Qualifications
What we are looking for :

- Minimum 5 years of experience in software product development, with at least 3 years focused on data analysis.

- Proficient in data analysis techniques using **SQL, Python**, and/or **Spark**.

- Experience with **BI tools** (preferably Spotfire, but knowledge of others such as SAP BI, Tableau, QlikView, or QlikSense is also valuable).

- Functional knowledge of IS systems and process modeling within the relevant business domain.

- General understanding of IT infrastructures (servers, operating systems, databases, networks).

- General knowledge of Google Cloud Platform (GCP) tools: BigQuery,
