Data Engineer (SQL, Python, GCP)

Hiring organization
EasyDo Digital Technologies

Employment Type
Full-time

Date posted
September 11, 2026

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe
We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions. Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

 Design and implementation of complete data processing pipelines, both on-premise and in the cloud.
 Development of data products for various functional domains.
 Creation of data ingestion pipelines and integration of basic ML algorithms.
 Building data products using SQL and NoSQL standards.
 Interactive visualizations with tools such as Looker, Spotfire, or Tableau.
 Consulting on technology and service selection and building a solid data tools ecosystem.

Qualifications

What we are looking for:
 Minimum 3 years of experience as a Data Engineer.
 Proven experience with DataLake or Data Warehouse environments (data modeling, data quality, flow monitoring).
 Minimum 2 years of experience in Python programming.
 Good knowledge of the following tools and technologies:
 Google Cloud Platform, GitLab, Airflow, DataProc, IntelliJ, Spark/Scala or equivalent.
 Exposure to AI/ML tools in development activities (e.g., Vertex AI, GitHub Copilot).
 Fluent English and experience in international working environments.
Desirable:
 Experience with AI projects, Dataiku, or Web applications is a strong plus.
 Familiarity with Jira and Confluence.

Job Benefits

We offer
 Competitive salary and the opportunity to have a meaningful job where you can make a difference
 The chance to continuously evolve as a professional
 Medical insurance & Meal tickets. Variety of training opportunities
