EasyDo Digital Technologies

Devops Engineer (GCP)

Description
Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions , driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities
We are looking for a skilled DevOps Engineer with strong experience in Google Cloud Platform (GCP) to support and automate our cloud infrastructure, application deployment, and CI/CD pipelines. You will collaborate closely with development and operations teams to ensure fast, secure, and scalable delivery of services.

- Implement, manage, and optimize cloud infrastructure on Google Cloud Platform (GCP) using services such as GKE, GCE, Cloud SQL, Serverless, and Big Data Services.

- Develop and maintain CI/CD pipelines using GitLab and GitHub Actions.

- Manage containerization and orchestration with Kubernetes and Docker.

- Automate infrastructure provisioning using Terraform.

- Support hybrid environments integrating on-premise and cloud projects.

- Collaborate with security teams to integrate DevSecOps practices.

- Monitor and alert on cloud infrastructure and applications.

- Participate in cloud migration and optimization initiatives.

- Apply best practices related to GitOps, Infrastructure as Code (IaC), and microservices architectures.

- Document processes and support teams in adopting new technologies.

Qualifications

- Strong hands-on experience with Google Cloud Platform (GCP) – GKE, GCE, Cloud SQL, Serverless, and Big Data services.

- Solid Linux administration experience and working knowledge of on-premise environments.

- Advanced skills in Kubernetes, Docker, and Terraform.

Hiring organization
EasyDo Digital Technologies

Employment Type
Full-time

Date posted
June 27, 2025

- Proven experience setting up and managing CI/CD pipelines using GitLab and GitHub Actions.

- Understanding of microservices architecture versus monolithic applications.

- Scripting and programming skills, preferably Python, Java, or JavaScript.

- Excellent communication and teamwork skills.

- Experience with Anthos and GitOps practices.

- Familiarity with DevOps tools like SonarQube and Artifactory.

- Experience with cloud monitoring and alerting tools (e.g., Google Stackdriver, Prometheus).

- Knowledge of Infrastructure as a Service (IaaS) concepts.

- Previous work in Agile/Scrum environments.

Job Benefits

- Competitive salary and the opportunity to have a meaningful job where you can make a difference
- The chance to continuously evolve as a professional
- Medical insurance & Meal tickets. Variety of training opportunities
