

Enterprise Architect

Description

Context: We are seeking an Enterprise Architect, experienced in event-driven / actor model architecture and CRM projects to help us drive our digital transformation. We are looking for someone who is genuinely passionate about architecture and eager to make an impact. In this role, you will collaborate closely with Agile teams, providing guidance and support to deliver effective solutions that meet the needs of our stakeholders. The ideal candidate is comfortable working with existing legacy systems while also bringing forward innovative ideas to modernize and enhance our technology landscape.

Responsibilities

Main responsibilities:

- o Define the Architecture Vision: contribute to the definition and maintenance of the Information Systems strategic plan
- o Establish and maintain the architecture strategy and roadmap, ensuring alignment with business goals and priorities
- o Identify business opportunities where IT can deliver value
- o Stay informed on emerging technologies and conduct technology watch and trend analysis
- o Develop and maintain the architecture framework (guidelines, standards, principles) in alignment with the Group's architecture strategy
- o Advocate for architecture practices based on a clear value proposition
- o Provide and update architectural reference models
- o Collaborate with other architects and stakeholders to evolve the Group's architecture framework
- o Govern and Control Architecture: evaluate project initiatives to ensure alignment with architectural strategy
- o Participate in organizing and running architecture review boards and committees
- o Contribute to project evaluations, validations, and solution selection processes
- o Ensure architectural designs meet business requirements, IT standards, and the defined framework
- o Support impact assessments and architectural studies based on evolving business needs
- o Collaborate with project teams to challenge and guide architectural solution layers
- o Provide recommendations to address performance, availability, and other non-functional requirements o Facilitate the sharing of knowledge, experience, and best practices within architecture teams
