Financial Consultant (ERP M3)

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Job Summary: Responsible for the management and reporting of financial information, including analysing data, preparing financial reports, budgets, tax returns, and accounting records.

Responsibilities

- Manage the relationship with internal clients by overseeing the analysis, design, development, and implementation of new business solutions, as well as the maintenance and optimization of existing systems.
- Participate in:
 - Internal testing of new or modified modules/applications.
 - Drafting and updating documentation related to designed applications.
 - Estimating task costs, including effort and duration.
 - Evaluating external solutions.
- Provide support during development, homologation testing, and the deployment of new developments into the production environments of the information system (IS).
- Contribute to evolutionary and corrective maintenance activities for applications by:
 - Analyzing evolving requirements according to current methodologies.
 - Investigating user-reported issues during application production, determining whether they are evolution requests or defects.
 - Analyzing errors, proposing corrective solutions, assisting with implementation, monitoring corrections, and promoting them within the IS production environments.

Qualifications

- Graduate of an IT-related faculty such as Polytechnic University, Faculty of Automation, or ASE, Faculty of Cybernetics.
- At least 4 years of experience in implementing and maintaining financial IT solutions.
- Familiarity with analysis and synthesis methods in the IT field.
- Proficient in Microsoft Office products.
- Experience with SQL, Jira and Confluence.
- Knowledge in ERP M3 analysis
- Experience of Agile projects
- Fluent English language
