iOS Developer

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe
We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.
Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Context: We are looking for a talented iOS Developer to join us and support the company's strategy in mobile development.

Responsibilities

- o Contribute to the full feature lifecycle, from ideation to production, adding value at every stage of the Agile process (planning, design, development, testing, release, and post-production support).
- o Lead code reviews to enhance code quality and foster a culture of continuous learning.
- o Collaborate closely with the Lead Developer, Technical Product Owner, and Enterprise Architect to define and design technical solutions for new features.
- o Propose and develop architectural improvement initiatives.
- o Troubleshoot, debug, and optimize applications to ensure high performance and stability.
- o Stay current with emerging technologies and industry trends.
- o Share expertise, promote best practices, and provide functional and technical guidance to the team

Qualifications

- o Strong proficiency in iOS development using SwiftUI, with demonstrable project experience.
- o Solid understanding of the mobile development ecosystem, including architectures, trends, and emerging technologies (e.g., Kotlin Multiplatform).
- o Excellent knowledge of RESTful APIs and their integration.
- o Ability to translate complex business and functional requirements into clear technical specifications.
- o Experience with Firebase services such as Cloud Messaging, Dynamic Links, and Crashlytics is an advantage.
- o Good understanding of mobile UX/UI principles and best practices.
- o Experience integrating third-party SDKs and services (e.g., camera functionality, document scanning, electronic signature solutions).
- o Familiarity with monitoring and logging tools (e.g., Firebase, Crashlytics).
- o Experience working with Azure DevOps and CI/CD pipelines.
- o Good understanding of Agile methodologies, particularly Scrum.
- o Fluent in English

Job Benefits

We offer:

- o Competitive salary and the opportunity to have a meaningful job where you can make a difference
