Java Lead Developer (+Angular)

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

- Define and maintain the overall technical architecture
- Mentor and guide developers on best practices, coding standards, and architectural principles.
- Drive the development of first functioning prototypes and ensure scalability for production.
- Collaborate with the Product Owner to prioritize features based on value/effort ratio.
- Break down complex requirements into actionable stories and tasks
- Distribute tasks among team members based on skills, experience, and workload.
- Document technical solutions and implementation details for the team.
- Establish and enforce automated testing strategies (unit, API, integration, functional) within a CI/CD pipeline.
- Monitor and improve code quality, performance, and security across the stack.
- Promote and implement best practices for maintainability and scalability.
- Take responsibility for the technical success and quality of the product.

Qualifications

- Strong Java programming skills (6+ years)
- Hands-on experience with Spring and Spring Boot (5+ years)
- Good understanding of microservices architecture, concepts, and design patterns
- Good understanding of RESTful API design and development
- Experience with messaging and event-driven systems (e.g., Solace, RabbitMQ, ActiveMQ, or Kafka)
- Knowledge of relational (PostgreSQL) and NoSQL databases (e.g., Redis, BigQuery)
- Experience with Angular 4 (or newer) and TypeScript is a strong advantage
- Hands-on experience with Git version control
- Experience designing and building scalable applications
- Expertise in automated testing concepts, methodologies, and frameworks
