EasyDo Digital Technologies

Lead Big Data Developer

Description
Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions , driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

- Collaborate closely with the solution architect to define and validate final technical solutions aligned with business needs and enterprise architecture.

- Manage integration challenges across multiple Renault teams and systems, adapting solutions based on diverse data sources and system constraints.

- Configure services within tools and platforms such as DBB (Data Backbone), Apigee (API Gateway), and Okta (Identity and Access Management).

- Coordinate with external technology partners to oversee API integration and ensure interoperability with third-party systems.

- Ensure high-quality implementation by enforcing coding standards, reviewing deliverables, and leading continuous improvement efforts.

- Act as a people manager with both technical leadership and human-oriented skills to support team performance, growth, and collaboration.

- Work alongside Business Analysts (BAs) to define and refine product backlog items (User Stories), participate in grooming sessions, and identify potential limitations and dependencies.

- Promote product vision and strategic alignment across development teams and stakeholders.
