## Middle Java Developer with French skills

### Description
**Empowering our Clients with People-Driven Digital Innovation Across Europe**

**We are a Group managing digital IT services and solutions** , driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

### Responsibilities
o Good understanding of detailed functional specifications and translation into technical specifications.
o Object oriented programming, unit tests, design patterns, web services, domain driven design and SQL server technologies.
o Provide exhaustive estimations of workload required to achieve the development and unit tests.
o Interest in and the ability to share technical solutions and ideas with colleagues verbally, in writing and in presentations.
o Ensure the compliance with specifications, standards and procedures (architecture, security, quality, documentation).
o Participate in design, code reviews, automation ideas, production supervision.
o Experience with agile methodologies – SCRUM framework.
o Excellent work habits, organized, results driven and integrity.
o A mindset for innovation, creativity, risk taking and product development

### Qualifications
o Expert in developing back-end application using Java 8+, Spring Spring boot and Spring Batch
o Sound understanding of front-end JavaScript technologies like React, with familiarity in Node.js for backend or development tooling.
o Adherence to best coding practices.
o Working knowledge of event-based architecture, Microservices preferred.
o Working knowledge of Continuous Integration and Continuous Deployment using Jenkins.
o Working knowledge of Linux Server – shell commands.
o Experience working with large, distributed systems and architectures.
o Experience on Database like PostgreSQL, MongoDB
o Experience working on unit cases (TDD, BDD, Sonar Coverage)
o Basic knowledge of Docker: creating, running, and managing containers.
o Basic understanding of Kubernetes concepts: pods, services, deployments.
o Familiarity with Linux command line.
o Understanding of CI/CD pipelines
o Very good level of English and good level of French (speaking/understanding)
