Mobile Test Automation Engineer

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions. Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

- Analyzing product requirements and specifications
- Propose a mobile test automation strategy/plan, facilitating automated scripts, maintenance and design
- Design test scenarios and cases ensuring there is traceability back to all business requirements
- Maintain existing automation scripts whenever necessary following functional changes for the respective flow/application
- Defines requirements for test data
- Ensures adherence to testing best practices and the Client's testing standards
- Integrate automated tests into the continuous integration and continuous deployment (CI/CD) pipeline to ensure early detection of defects and provide rapid feedback to development teams
- Perform the automated execution results analysis and debug automated test scripts
- Identify, document, and report software defects and inconsistencies using bug tracking systems
- Create clear and concise test documentation, including test plans, test cases, and test scripts, to facilitate knowledge transfer and maintain consistency in testing processes
- Create test reports / Support test reports / Support risk assessment
