Mobile Test Automation Engineer

Hiring organization
EasyDo Digital Technologies

Employment Type
Full-time

Date posted
January 8, 2026

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions , driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Supports the team to fully **leverage the digital architecture** and Continuous Integration / Continuous Deployment development pipeline.

We are looking for a Mobile Test Automation Engineer to join our fast-growing team and be part of a large-scale project focused on automation testing, having extensive interaction with project actors.

Responsibilities

- Design, write, and execute validation test plans for each iteration
- Contribute to the definition of acceptance criteria for user stories and write associated acceptance scenarios
- Contribute to the test automation strategy
- Design and implement test repository: test cases with associated test data made available to the team
- Implement regression testing
- Help define and regularly update team deliverables (Definition of Ready, Definition of Done etc.)
- Monitor the resolution of defects and produce test evidence
- Provide the necessary elements for test documentation and test reports
- Collaborate and interact with the other testers from other squads within the Tribe
- Collaborate with the Center of Expertise colleagues

Qualifications

What we are looking for:

- Advanced English level, written and spoken
- Previous experience in automation with Java, Selenium
- Previous experience in writing BDD scenarios for cross-functional clarity with Cucumber
- Previous experience in API testing, collections and scripts with Postman
- Previous experience with JIRA (tracking anomalies/backlog/user stories within the squad)
- Knowledge of agile methodology
- Excellent written and verbal communication skills, the ability to communicate efficiently with the team (business, developers, POs)
- The ability to work and collaborate with others
- Good planning, organization, and time management skills

Nice to have:

- ISTQB certification would be a plus
- Previous experience in Mobile Testing
- Previous experience in banking projects

Job Benefits

- Competitive salary and the opportunity to have a meaningful job where you can make a difference
- The chance to continuously evolve as a professional
- Medical insurance & Meal tickets. Variety of training opportunities
