Senior Network Security Engineer with French

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

- **Mission:**We are seeking a highly skilled Network Security Engineer to safeguard and maintain the integrity of our production infrastructure. This role focuses on ensuring a secure, compliant, and resilient environment by managing and evolving perimeter security technologies such as firewalls, proxies, and web application firewalls (WAF). You'll play a central role in protecting systems and data against both internal and external cyber threats while supporting projects and incident resolution efforts.
- **Key Responsibilities:**Perimeter Security Implementation
- Configure, deploy, and maintain filtering rules across firewalls, routers, proxies, and WAFs based on approved requests.
- Support the rollout of global and local security policies across filtering platforms.
- Actively contribute to secure network architecture by managing flows for applications and projects.
- **Operational & Incident Management**
- Monitor and manage security incidents within your scope, ensuring timely resolution and service continuity.
- Investigate technical anomalies or service disruptions, escalating and documenting as needed.
- Maintain availability, performance, and scalability of security tools, ensuring full lifecycle management including updates and upgrades.
- **Process & Policy Alignment**
- Ensure compliance with internal security policies and procedures such as Firewall Request Management.
- Collaborate with internal security, production, and architecture teams to align technical controls with business risk requirements.
- Draft and maintain procedures to support consistent operational execution.
- **Vendor and Tool Oversight**
- Act as a technical point of contact for vendors providing filtering technologies.
- Participate in tool configuration, deployment strategies, and roadmap planning to mitigate obsolescence and support automation.

Hiring organization

EasyDo Digital Technologies

Employment Type

Full-time

Date posted

July 15, 2025

- Security Best Practices & Continuous Improvement
 - Advocate and implement cybersecurity best practices.
 - Propose and develop enhancements to increase efficiency and security posture across systems.
-
- Required Skills & Experience: Strong troubleshooting capabilities with experience in managing security incidents in enterprise environments.
 - Familiarity with change management and incident tracking tools (e.g., ServiceNow).
 - Ability to contribute to audits, risk assessments, and network segmentation strategies.
 - Project participation in deploying or optimizing perimeter security infrastructure.
 - Exposure to DevOps and Agile methodologies (Scrum, Kanban).
