QA Automation Engineer (Cypress)

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Context:

We are looking for a driven and adaptable QA Engineer to join our team. In this role, you will help maintain the quality of our web applications through a combination of manual and automated testing approaches. Collaborating closely with developers, business analysts, and the product owner, you'll identify, document, and help resolve issues to deliver a smooth and dependable user experience. The ideal candidate will have a solid grasp of web application architecture and a strong commitment to quality.

Responsibilities

Manual Testing:

- Conduct manual testing for new features, bug fixes, and regression scenarios to ensure product quality.
- Review business requirements and technical specifications to create detailed test plans and test cases.
- Execute test cases and document results with precision.
- Log and manage defects using JIRA, ensuring clear and consistent tracking.
- Collaborate closely with developers to investigate and resolve issues.

Automated Testing:

- Design, implement, and maintain automated test scripts using Cypress for stable components of the application.
- Review and refine existing automated tests, improving reliability and performance.
- Integrate automated tests into the CI/CD pipeline to support continuous delivery.
- Research and recommend tools and technologies, including AI-based solutions, to advance the automation process.

Documentation & Communication:

- Develop and maintain clear documentation, including test plans, test cases, and test results.
- Communicate testing outcomes and defect findings effectively.
- Contribute to team knowledge by documenting processes and best

practices in Confluence.

Collaboration & Proactivity:

- Actively engage in daily stand-ups, sprint planning, and retrospectives.
- Work closely with developers and business analysts to clarify requirements and ensure they are testable.
- Identify opportunities for improving testing efficiency and propose actionable solutions.
- Stay adaptable and maintain a positive, team-oriented mindset in a fast-paced environment.

Qualifications

Required Skills and Experience:

- 3+ years of experience as a QA Engineer, with a strong focus on web application testing.
- Proficient in using Cypress for integration and end-to-end testing of web applications.
- Solid understanding of software testing principles, methodologies, and best practices.
- Hands-on experience with manual testing techniques such as black-box, regression, and exploratory testing.
- Skilled in developing and executing test cases derived from user stories and functional requirements.
- Familiarity with web application architecture and technologies including Angular, TypeScript, Java, Spring Boot, and PostgreSQL.
- Comfortable using browser developer tools (e.g., Chrome DevTools, Firefox Developer Tools) for inspection and debugging.
- Experience testing APIs with tools like Insomnia or Postman.
- Proficient in using JIRA for issue tracking and project coordination.
- Strong communication, collaboration, and analytical skills.
- Competent in Microsoft Office Suite (Word, Excel, PowerPoint).
- Working knowledge of SQL for data validation and database verification.

Preferred Technical Skills:

- Experience with AI-enhanced testing tools and strategies.
- Understanding of CI/CD workflows and integration of automated tests into pipelines.
- Familiarity with test management platforms such as Xray, TestRail, or TestLink.
- Knowledge of performance testing tools and techniques.
- Basic coding skills in JavaScript or TypeScript.

Job Benefits

- Competitive salary and the opportunity to have a meaningful job where you can make a difference
- The chance to continuously evolve as a professional
- Medical insurance & Meal tickets. Variety of training opportunities
