Quality Assurance Engineer (French & Tosca)

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

- Design, develop, and execute test plans, test cases, and test scripts to ensure high-quality application releases.
- Perform functional, regression, integration, performance, and security testing as per project requirements.
- Identify, document, and track bugs and defects in collaboration with development teams using tools like JIRA or TestRail.
- Work closely with developers, product managers, and business analysts to understand requirements and define test strategies.
- Automate test cases using industry-standard tools and frameworks such as Selenium, Playwright and Tosca.
- Conduct API testing using tools like Postman or SoapUI.
- Participate in agile development processes, including sprint planning, daily stand-ups, and retrospectives.
- Ensure compliance with security, performance, and regulatory standards in the banking sector.
- Contribute to the continuous improvement of QA processes, tools, and best practices.

Qualifications

- o Solid expertise in test management tools.
- o In-depth understanding of various testing types and strategies, including: Unit Testing, Integration Testing, Functional Testing (Smoke, Regression, UAT), Non-functional Testing (Performance, Security)
- o Proficiency with testing tools such as Playwright, Cypress, Karate, Gatling, k6, JMeter, or similar.
- o Good working knowledge of development languages like Java, JavaScript, TypeScript, and Python.
- o Strong experience with test automation within CI pipelines using tools such as GitLab CI, Git, and Docker.
- o Familiarity with Generative AI tools (e.g., GitHub Copilot, GitLab Duo).
- o Professional experience in quality assurance and test management processes.
