SAP COGS PP Business Analyst

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

Context: We are seeking a SAP CO S/4HANA consultant to provide expertise in ensuring the consistency of end-to-end solution integration. This role involves collaborating with the responsible IT teams throughout the implementation and deployment phases of the S/4HANA Finance project. The primary objective is to gain in-depth knowledge of the solution and oversee its implementation.

Main responsibilities:

- o Assist in business workshops to design the future Core Design, ensuring seamless end-to-end integration of the S/4HANA Finance solution.
- o Support adjustments to CO and PP configurations based on workshop outcomes.
- o Manage relationships with stakeholders and development teams.
- o Draft detailed specification documents in English.
- o Provide MVP startup support.
- o Identify post-MVP releases with the IT teams and define implementation methods to minimize operational impacts on the existing IS.
- o Contribute to the integration, testing, and migration strategy.
- o Provide digital expertise to refine solutions envisioned by the Product Owner, ensuring alignment with best practices and market standards.
- o Advise on potential improvements in the product backlog.
- o Assist the Product Owner in prioritizing the Product Backlog.
- o Propose prioritization adjustments based on perceived business value.
- o Ensure the Product Backlog remains visible, transparent, and well-documented.
- o Define and detail each selected feature as a User Story, ensuring it is small enough to be implemented within one sprint and includes clear acceptance criteria.
- o Understand and prioritize Technical Stories and Defect Stories suggested by the team.
- o Clarify any User Story upon request from the Development Team during a sprint.
- o Participate in and contribute to Agile events with the team.

Qualifications

- o Strong business analysis expertise.
- o Ability to model business flows in the new IS system based on S/4HANA.
- o In-depth knowledge of controlling processes and flows.
- o Experience in defining and managing interfaces for the CO and PP domains.

Solid understanding of MM and FI integration.

- o Hands-on experience with S/4HANA system configuration.
- o Proficiency in working with Agile Scrum methodologies.
- o Strong problem-solving skills and interpersonal abilities.
