SAP Data Migration Consultant

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

Mission

As part of the Finance transformation project, we are looking for a service Data Migration consultant to ensure the gathering of business requirements for data migration needs and work across multiple functional teams to understand data usage and implications for data migration. The service will consist of integrating the teams to participate in the implementation phases and deployment of the S/4 HANA Finance project.

Activities & Tasks

- Design ETL jobs to extract, cleanse, validate, and transform data from SAP and non-SAP data sources
- Create and execute load programs to load data into SAP from Data Services using IDoc, BAPI, LSMW, LTMC & custom ABAP program load methods
- Utilize Data Quality module of Data Services including cleansing, matching & de-duplication of data
- Develop data quality routines with real-time trigger-based alerts for data analysis utilizing SAP BODS Real Time jobs, Migration Cockpit SAP Data Quality Management
- Define systems strategy, developing systems requirements, designing and prototyping, testing, training, defining support procedures, and implementing practical business solutions under multiple deadlines
- Utilize data validation, data security, and data sensitivity requirements
- Understand a client's problem statement in regards to data, across migration, data governance and analytics

Qualifications

Skills & Competencies

- University Degree (with diploma) in any specialty related to the field
- Working on at least 2-3 Full Life Cycle Implementations in SAP S4 HANA including conducting Blueprint/Design workshops, requirements gathering, data mapping, gap analysis, custom object development, data loading, unit testing, integration testing and go-live strategies

Hiring organization

EasyDo Digital Technologies

Employment Type

Full-time, Contractor

Job Location

Remote work possible

Date posted

May 6, 2025

- Understanding of SAP data dependencies across functional domains: FI, CO, SD, MM, PP;
- Previous functional experience on FI, MM modules (ideally 2 years plus)
- Leveraging problem solving and troubleshooting skills
- Experience with IDoc, BAPI, LSMW, Migration Cockpit, LTMC, & custom ABAP program load methods knowledge
- Very good level of English

Profile

- Knowledge in other data SAP domains: SAP MDG for data governance, SAP SAC for Data Analytics;
- Written, presentation, communication, and relationship-management skills;
- Team player attitude with a sense of synthesis and attention to details
- At least 2 years of experience in Agile projects, especially digital projects
- French language would be a plus.

Job Benefits

- Competitive salary and the opportunity to have a meaningful job where you can make a difference
- The chance to continuously evolve as a professional
- Medical insurance & Meal tickets. Variety of training opportunities.
