SAP SAC Expert

Description

Context: The SAP Analytics Cloud (SAC) Expert supports the digital transformation of Finance and EPM ecosystems by enabling advanced analytics and planning solutions. Operating in an international environment, he/she works closely with Data, SAP Consultants, and Finance teams and plays a key role in the delivery of innovative SAP-based solutions.

Responsibilities

Main responsibilities:

- Leadership and contribution to EPM transformation programs
- Active participation in business and design workshops
- Coordination and facilitation between business stakeholders and development teams
- Production of technical design documentation and specifications (English)
- Support to the Product Owner in prioritizing the Product Backlog
- Proposal of backlog prioritization adjustments based on value and impact
- Contribution to Product Backlog lifecycle management
- Ensuring transparency, accessibility, and shared understanding of the Product Backlog across stakeholders
- Breakdown of selected features into detailed User Stories with clear acceptance criteria to support sprint execution
- Prioritization and clarification of Technical and Defect Stories raised by the development team
- On-demand clarification of User Stories during sprint execution
- Active participation in Agile ceremonies and team events
- Support for the development of SAC stories, dashboards, and advanced analytical applications
- Design, optimization, and maintenance of SAC data models and implementation of planning capabilities (Data Actions, Advanced Formulas, Calendar)
- Integration of SAC with SAP Datasphere, SAP BW/4HANA, and SAP S/4HANA
- Performance tuning of data models, connections, and reports
- Conversion of business needs into robust and efficient reporting and planning solutions
- Technical mentoring and active contribution to the skill development of the EPM team

Qualifications

What we are looking for :

Profile:

- At least 5 years of practical experience with SAP Analytics Cloud (Analytics and/or Planning)
- Proven EPM expertise demonstrated through a minimum of three complex implementations
- Strong background in data modeling, SAC integrations (BW, HANA, S/4), and planning processes
- Excellent communication skills to effectively engage with business and IT
