EasyDo Digital Technologies

SAP SD Consultant – S/4HANA

Description

We are looking for an experienced SAP S/4HANA SD Functional Consultant. The role involves providing expert guidance to ensure the consistency and full end-to-end integration of the O2C solution, participating in the implementation and deployment phases of the S/4HANA Finance project. The goal is to take ownership of the O2C solution and manage its successful rollout in close collaboration with IS/IT and business project teams.

Responsibilities

- Support business workshops to define the future Core Model and ensure seamless integration of the S/4HANA Finance O2C processes.

- Adapt and configure the Order-to-Cash module based on business requirements identified in workshops.

- Facilitate communication and coordination between stakeholders and development teams.

- Produce comprehensive functional specification documents in English.

- Support the MVP (Minimum Viable Product) launch phase.

- Collaborate with IT teams to identify and plan post-MVP releases, minimizing disruptions to existing systems.

- Contribute to the Master Data and Data Cleansing strategy for successful system integration.

- Assist in the planning and execution of integration, testing, and data migration activities.

- Provide digital insight to enhance proposed solutions from Product Owners, ensuring alignment with best practices and industry standards.

- Advise on potential improvements to the product backlog and assist in its prioritization.

- Recommend adjustments to prioritization based on business value.

- Contribute to the overall lifecycle management of the Product Backlog.

- Ensure the Product Backlog remains clear, visible, and well-understood by all stakeholders.

- Break down features into actionable user stories, including clear acceptance criteria for development within a sprint.

- Understand and prioritize technical stories and defect resolution items as proposed by the development team.

- Clarify user stories as needed during sprint cycles.

- Actively participate in Agile ceremonies and collaborate effectively with the Scrum team.

Qualifications

Skills & Competencies:

- Strong business analysis capabilities.

- Experience modeling business processes in an S/4HANA-based information system.

- In-depth knowledge of the Order-to-Cash process within SAP.

- Experience defining and managing both master and transactional data interfaces for the O2C domain.

- Hands-on experience with SAP S/4HANA configuration.

- Solid understanding of Agile and Scrum methodologies.

- Proactive, with strong interpersonal and communication skills.

- Excellent listening and articulation skills.

- Fluent in English (written and spoken).

- Strong collaboration skills and a detail-oriented, analytical mindset.

- Comfortable with knowledge sharing and mentoring team members and stakeholders.

- Familiar with working on innovative, business-driven digital projects.

Ideal Profile:

- Over 5 years of experience in large-scale ERP or digital transformation projects.

- Proven track record with SAP S/4HANA implementations, particularly in the Order-to-Cash domain.

- Familiarity with SAP PO (Process Orchestration) and BTP (Business Technology Platform) is a plus.

- Minimum of 2 years working in Agile environments, particularly on digital projects.

- Strong command of English is essential.
