Scrum Master

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

- Understanding & practicing Agility while providing leadership in the adoption of Agile practices, culture and values by teams
- Facilitating Scrum events as requested/ needed while promoting the Scrum framework, tools and practices
- Providing assistance to the team during the framing phase of the product development in order to maximize the value creation
- Acting as a point of contact between the organization and the team in order to ensure that the required skills are staffed allowing efficient product development
- Helping the PO to keep focused on customer alignment and value creation, to achieve product objectives using Scrum, to understand product planning in an empirical environment and ensures that PO knows how to arrange the Product Backlog to maximize value
- Motivates and coaches the team in self-organization and cross-functionality, enables the team to improve its efficiency and quality of deliverables while protecting it from external interruptions and facilitating project level obstacle removal and team consensus on solutions
- Coaches the Development Team in organizational environments in which Scrum is not yet fully adopted and understood
- Offers his/her help to understand the need for clear and concise User Stories
- Installs a culture of continuous improvement and communicates on development progress
- Coordinates Agile artifacts delivery (including technology and business value deliverables) and builds Agile dashboards
- Helps stakeholders and employees understand and enact Scrum and empirical product development while leading & coaching the organization in its Agile & Scrum adoption, working with other Scrum Masters causing changes that increase the productivity of the Scrum Team and increase the effectiveness of the application of Scrum in the organization

Qualifications

- At least 5 years of experience in Agile projects and 5 years as a Scrum Master
- Excellent knowledge and understanding of the Agile Manifesto & Agile methodologies, from a theoretical and a practical standpoint
