EasyDo Digital Technologies

Senior IT Business Analyst (SQL)

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

Mission

The primary role of the Agile Business Analyst is to support the Product Owner in the day-to-day management of the product backlog. This includes drafting and validating User Stories, organizing backlog items, and assisting in their prioritization. However, the Agile Business Analyst does not replace the Product Owner, who remains solely responsible for the backlog and the final decision-maker.

Activities & Tasks

- Provide expertise in digital technologies and trends

- Offer insights to enhance solutions envisioned by the Product Owner

- Recommend improvements to the product backlog

- Assist the Product Owner in prioritizing backlog items

- Suggest prioritization adjustments based on perceived value

- Contribute throughout the lifecycle of the product backlog

- Ensure the backlog remains visible, transparent, and well understood by all stakeholders

- Break down features into manageable User Stories for delivery within a sprint, including clear acceptance criteria

- Understand and prioritize technical and defect-related stories proposed by the development team

- Clarify User Stories during sprints as requested by the development team

- Actively participate in Agile ceremonies and events with the team

- Support the testing of User Stories developed by the Agile team

- Accept or reject completed User Stories (when delegated by the Product Owner)
