EasyDo Digital Technologies

Senior Java Fullstack Developer with French

Description
Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions , driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities
o Develop, test, and deploy high-quality software solutions for both front-end and back-end components of web applications using Java and related technologies.
o Collaborate with cross-functional teams to gather and analyze requirements, design solutions, and implement features that meet business needs.
o Participate in code reviews, providing constructive feedback and ensuring adherence to coding standards and best practices.
o Troubleshoot and debug issues, and implement fixes to ensure the stability, performance, and security of applications.
o Stay updated on industry trends and emerging technologies, and continuously improve technical skills and knowledge.

Qualifications
o 5+ years of experience in Java development(vers. 8+), with a focus on full stack development for web applications.
o Proficiency in front-end technologies and modern frameworks like React/Angular (+3y).
o Strong understanding of object-oriented programming principles and design patterns.
o Experience with back-end technologies such as Spring Boot, Hibernate, and RESTful APIs.
o Familiarity with database systems such as MySQL, PostgreSQL, or MongoDB.
o Experience with version control systems (e.g., Git) and CI/CD pipelines.
o Very good level of English and good level of French (speaking/understanding).
o Bachelor's degree in Computer Science, Engineering, or a related field

Would be appreciated:
o Experience with cloud platforms such as AWS, Azure, or Google Cloud Platform.
o Knowledge of containerization and orchestration tools like Docker and Kubernetes.
o Familiarity with Agile development methodologies.
