- Develop machine learning applications according to requirements
- Select appropriate datasets and data representation methods
- Run machine learning tests and experiments
- Perform statistical analysis and fine-tuning using test results
- Train and retrain systems when necessary
- Extend existing ML libraries and frameworks

Qualifications

- Proven experience as a Machine Learning Engineer or similar role
- Understanding of data structures, data modeling and software architecture
- Deep knowledge or experience with:
    - Google Python SDK for Vertex
    - Model Deployment & Lifecycle
    - Design Principles in Machine Learning
- Experience with ML Ops tooling
- Experience with Docker
- SDK python Google AIPlatform
- GCP Big Query
- git, gitlab
- Good skills for data processing with pandas
- Familiarity with:

- Google Vertex AI
        - FastAPI
        - Kubernetes
        - Jupyter Notebook
        - xgboost
        - scikit-learn
        - sql
  - Ability to work in a team
  - Outstanding analytical and problem-solving skills
  - Very good level of English, French is plus

Job Benefits

We offer

  - Competitive salary and the opportunity to have a meaningful job where you can make a difference
  - The chance to continuously evolve as a professional
  - Medical insurance & Meal tickets. Variety of training opportunities
