

Senior UI/UX Designer (6+ month mission)

Description

We are looking for a **Senior UI/UX Designer** to support the design and evolution of a complex enterprise web application used in electricity market operations.

You will join an R&D team working on high-impact software used in areas such as energy trading, capacity auctions, bidding, scheduling, settlement, balancing, reserve, and congestion management.

This role is ideal for an experienced designer who can quickly understand an existing application, analyze current user interfaces and flows, and propose effective design improvements with limited ramp-up time.

The role is initially assigned for 6 months, with the possibility of extension depending on project needs and delivery results.

Responsibilities

- Design intuitive UI/UX solutions for complex web applications
- Create user flows, wireframes, mockups, and interactive prototypes in Figma
- Analyze existing screens and workflows and propose usability and visual improvements
- Design data-heavy interfaces including multi-layer forms, dashboards, and grid-based screens
- Collaborate closely with product owners, business analysts, developers, and other stakeholders
- Support implementation by ensuring clear handoff and alignment with engineering teams
- Contribute to consistency, reusable patterns, and overall design quality across the product

Qualifications

Technical Skills:

- Strong proven experience in UI/UX design for web applications
- Very good knowledge of Figma
- Ability to create wireframes, mockups, prototypes, and user flows
- Experience with complex, enterprise and data-intensive applications
- Strong understanding of usability, interaction design, and responsive design
- Ability to review existing applications and identify improvement opportunities
- Strong autonomy and English communication skills, written and spoken
- Ability to work effectively in an international and distributed team

Nice to Have:

- Experience with ag-Grid or similar advanced data-grid components
- Experience designing applications built with Angular
- Basic understanding of HTML, CSS and frontend implementation constraints
- Experience with design systems and reusable component libraries
