## TOSCA Automation Engineer

### Description

**Empowering our Clients with People-Driven Digital Innovation Across Europe**

**We are a Group managing digital IT services and solutions**, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

### Responsibilities

- Propose a test automation strategy/plan, facilitating automated scripts maintenance and design (framework, modularization etc.)
- Design efficient functional test scenarios and cases ensuring there is traceability back to all business requirements
- Integrate automated tests into the continuous integration and continuous deployment (CI/CD) pipeline to ensure early detection of defects and provide rapid feedback to development teams
- Schedule automated execution according to the shared best practices
- Identify, document, and report software defects and inconsistencies using bug tracking systems
- Perform the automated execution results analysis and debug automated test scripts
- Create clear and concise test documentation, including test plans, test cases, and test scripts, to facilitate knowledge transfer and maintain consistency in testing processes
- Define required test environment and test data needs
- Coordinate test data requests/create test data
- Create test reports / Support test reports / Support risk assessment

### Qualifications

- Previous experience with low code automation frameworks (Tosca)
- Previous experience in Web UI and API Automation with Java, Selenium, Maven, GIT, Rest Assured
- Previous experience in API testing tools (Postman, SoapUI, etc.)
