Transversal Solution Architect with French

Description

Empowering our Clients with People-Driven Digital Innovation Across Europe

We are a Group managing digital IT services and solutions, driven by people, innovation, agility, and deep industry insight. We are working with the largest private and public institutions to deliver IT services and solutions.

Being an entrepreneurial digital services group with a Human-Sized Tech Company, we are built by passionate experts and led by seasoned leaders in IT and digital transformation.

Responsibilities

- **Define the cross-functional architecture for IT transformation initiatives**, in close collaboration with product teams and fellow architects:
 - Facilitate architecture definition workshops to collect business requirements and understand key processes
 - Identify relevant data sources and required interfaces
 - Assess high-level impacts on existing solutions and future product developments
 - Encourage innovation enabled by technological advances and the company's digital transformation
 - Design the target architecture and outline the roadmap to reach it
 - Document and formalize selected architectures in the architecture repository
 - Work with Enterprise and Solution Architects to shape IT transformation roadmaps and manage the study portfolio
 - Contribute to the definition of enterprise business information models and ensure their use in projects

Contribute to the internal architecture community:

- Develop and maintain the application and architecture mapping repository
- Continuously enhance architecture principles, standards, and guidelines
- Define and support the deployment of tools that industrialize architecture practices
- Participate in architecture governance bodies and support project decision-making from an architectural standpoint

Deliverables:

- Architecture principles and guidelines
- Global Architecture Specifications within project scopes
- Updated application and system mappings

Qualifications

Daily Team Activities:

Hiring organization

EasyDo Digital Technologies

Employment Type

Full-time

Date posted

January 30, 2026

- Active participation in agile ceremonies within the architecture squad
- Engagement in peer exchanges to share best practices and collaboratively resolve challenges
- Attendance at chapter-level team meetings
- In an agile environment, close collaboration with project teams, IT, and business stakeholders, applying architectural expertise
- Depending on project scope, interaction with partners and subsidiaries, including international stakeholders

What we are looking for :

Profile:

- Master's degree in IT or a related field, with more than 10 years of experience in architecture roles
- Strong dual background in both Business and IT, preferably within engineering, manufacturing, or logistics domains
- Proven experience working in international contexts and matrix organizations

Skills and Knowledge:

- Comprehensive understanding of Enterprise Architecture components
- Strong expertise in Cloud technologies, data management, and interoperability challenges
- Confirmed experience with SAP implementations and solid knowledge of core SAP modules (FI, CO, MM, SD)
- Expertise in Joint Venture Accounting is a strong advantage
- Proficiency in architecture modeling methodologies and tools
- Ability to balance long-term strategic vision with short-term transformation needs
- Excellent communication skills to articulate and defend architectural decisions beyond purely technical aspects
- Pragmatic mindset focused on delivering effective, value-driven solutions
- Strong capability to operate within agile frameworks
- Demonstrated team-oriented approach
- **Fluency in both English and French**
- Performance in this role is driven by attentiveness, critical thinking, and the ability to constructively challenge existing practices, fostering continuous improvement through experience and perspective.

Other Expected Skills: Agile Architecture, Agile Fundamentals, Architecture Governance, Architecture Principles, Cloud Integration Principles, Communication, Enterprise Architecture, Functional Architecture, Modeling Tools, Reference Data Management, Scalable Architectures, Team Collaboration, Urbanization

Job Benefits

- Competitive salary and the opportunity to have a meaningful job where you can make a difference
- The chance to continuously evolve as a professional
- Medical insurance & Meal tickets.
